Skills

- **Languages** : Java ,Python, C, SQL, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS)
- **Technologies** : Pandas, NumPy, Seaborn, Matplotlib, Node.js, Express.js ,Git, Tableau, Power-Bi , Jupyter Notebook, MySQL
- **Soft Skills** : Leadership, Collaborative, Problem solving, Adaptability, Project management, Resilient

Projects

E-Commerce Sales & Customer Behavior Analysis | Numpy, Panda, Matplotlib, Seaborn, Python Feb 2026

- Conducted EDA on 2023 e-commerce sales data (Amazon) to extract customer behavior trends and purchasing patterns.
- Analyzed key metrics (Product Price, Discounts, Revenue, Order Frequency) to quantify sales growth and repeat purchase rates.
- Visualized insights through trend lines and heatmaps, highlighting top categories and customer retention.
- Delivered actionable, data-driven recommendations that informed pricing models, marketing segmentation, and customer retention strategies, driving measurable improvements in sales performance and engagement.
- Identified 15% higher repeat purchase rate in electronics and 10% revenue lift linked to targeted discount strategies.

Student Review Web Application | Python, Flask, HTML, CSS, Bootstrap Jan 2026

- Developed a web-based student review system using Flask, enabling users to submit and view feedback through dynamic web forms.
- Implemented HTTP GET and POST request handling with Flask routing, ensuring secure form submission and efficient server-client communication.
- Structured the application with modular architecture separating backend logic, templates, and static assets, improving maintainability and scalability.
- Applied Post/Redirect/Get (PRG) using redirect and url_for to prevent duplicate form submissions effectively.
- Designed a responsive UI with Bootstrap and Jinja2, enabling dynamic display of student reviews efficiently.

Training

Apna College

Java And Data Structures And Algorithms: Dec 25-Ongoing

- Mastering Java fundamentals and object-oriented programming to establish a strong software development foundation.
- Developing and optimizing data structures (Arrays, Linked Lists, Stacks, Queues, Trees, Graphs).
- Applying algorithms (Sorting, Searching, Traversals) to efficiently solve complex programming challenges.
- Building problem-solving techniques to improve coding efficiency and algorithmic thinking through structured exercises.
- Achieving measurable growth in analytical and problem-solving skills, enabling faster and more optimized solutions.

Certificates

- Generative Artificial Intelligence - Oracle Oct 2025
- Data Analytics Job Simulation – Forage Sep 2025
- Mastering C++ : From Object-Oriented to Dynamic Programming – LPU Jun 2025
- Python Programming – IHUB DivyaSampark: IIT Roorkee Sep 2024

Achievements

- **Event Management:** Aug 2025
  Coordinated the opening ceremony of the Shihab Thangal Cultural Centre, attended by Hon'ble Member of Parliament Shri Ashok Kumar Mittal, Founder of Lovely Professional University, along with several other distinguished MPs.
- **Leadership & Extra Curricular:** May 2024
  Volunteered with a regional NGO working for senior citizen welfare, where I supported outreach efforts, helped organize welfare programs, and participated in regular engagement activities.

Education

Lovely Professional University Punjab, India
Bachelor of Technology - Computer Science and Engineering CGPA : 7.89 Since 2023

Saint Joseph School Baramulla, J&K
Intermediate ;PCMB; 77.6% 2021 –2022
